Form Fin 1 SAMPLE FORMAT FOR FINANCIAL BID*(Sample format to be prescribed in excel of the slot provided in the E-Procurement Portal)***Objectives***The objectives of the Bill of Quantities are:*

- a. /o provide sufficient information on the quantities of Works to be performed to enable bids to be prepared efficiently and accurately, and*
- b. when a Contract has been entered into, to provide a priced Bill of Quantities for use in the periodic valuation of Works executed.*

In order to attain these objectives, Items should be itemized in the Bill of Quantities in sufficient detail to distinguish between the different classes of Works, or between Works of the same nature carried out in different locations or in other circumstances which may give rise to different considerations of cost. Consistent with these requirements, the layout and contents of the Bill of Quantities should be as simple and brief as possible.

Provisional Sums

A general provision for physical contingencies (quantity overruns) may be made by including a provisional sum in the Summary Bill of Quantities. Similarly, a contingency allowance for possible price increases should be provided as a provisional sum in the Summary priced Bill of Quantities. The inclusion of such provisional sums often facilitates budgetary approval by avoiding the need to request periodic supplementary approvals as the future need arises. Where such provisional sums or contingency allowances are used, the Special Conditions of Contract should state the manner in which they shall be used, and under whose authority (usually the Project Manager's/ Engineer-in-Charge's).

These Notes for Preparing a Bill of Quantities are intended only as information for the Employer or the person drafting the Bidding Documents. They should not be included in the final documents.

Sl. No.	Description of item (with brief specification and reference to Book of specification)	Quantity	Unit	Rate (Rs)		Total Amount (Rs)

2. Unit rates and prices shall be quoted by the Bidder in Indian Rupees.
3. Where there is a discrepancy between the rate in figures and words, the amount in word will govern. [ITB Clause 23.1(a)]
4. Where there is a discrepancy between the unit rate and the line-item total resulting from multiplying the unit rate by quantity, the unit rate quoted shall govern [ITB Clause 23.1 (b)]

The Specifications should require that all goods and materials to be incorporated in the Works be new, unused, of the most recent or current models, and incorporate all recent improvements in design and materials unless provided otherwise in the Contract.

Samples of Specifications from previous similar projects in the same region are useful in to prepare Specifications. Most Specifications are normally written specially by the Employer or Project Manager/ Engineer-in-Charge to suit the Contract Works in hand.
